

# About Epicure

Epicure was established in 2003 by Trevor Allen it's Managing Director with the objective to provide high quality food services to International Schools in Thailand. Our aim was to fill what we perceived to be a gap between the quality of service provided by International and locally based catering companies by implementing and adopting the best International standards and practices, using a team of experienced expatriate and local management.

Epicure takes great pride in the quality of food offered, this in addition to the high level of service we provide and our flexible "can do" approach further strengthens our ability to work in close partnership with our clients and ensure their complete satisfaction. We have an excellent reputation and strong customer loyalty which our main international competitors and leading local catering companies, have not been able to replicate in this market sector.

2015 proved to be a milestone for Epicure with expansion across the region into Cambodia, working in partnership with the International School of Phnom Penh (ISPP) in designing the kitchen at the their new campus and taking on the catering contract to operate their food services, a new emerging market that proved to be successful and continues to flourish.

In 2017 Epicure launched its first ventures in Vietnam with 2 leading International Schools, which was quickly followed by adding another prestigious contract the following year.

In January 2019 Epicure signed a strategic partnership with Dusit International to enhance our operations and add even more value to our customers throughout the region.

Besides being one of Thailand's leading hotel and property development companies, with 70 years of international experience behind them, Dusit International is also a leading provider of hospitality education and has rich experience in outside catering – and the same passion for excellence we share here at Epicure.

By partnering with Dusit, our company will now have direct access to state-of-the-art training facilities at Dusit Thani Colleges, which offer culinary courses accredited by the renowned Institute Paul Bocuse, as well as Le Cordon Bleu Dusit Culinary School. By drawing on Dusit's resources and support, we will also be well positioned to continue our regional expansion in emerging markets without impacting the personalized service we proudly offer to all of our clients.

January 2020, Epicure acquired 'The Caterers', Vietnams leading educational food service provider. The Caterers have over 40 contracts and provide in excess of 20,000 meals per day across Vietnam, employing around 700 staff.

Epicure now employs over 1,200 skilled cooks and chefs, with 10 expatriates across Thailand, Vietnam and Cambodia.
